

HB 6618 Providing Abortion to women from other states

I am opposed to this bill.

Connecticut has no business encouraging women from other states to come to our state for free abortions. I object to my tax dollars being used to kill babies in general, but this is total overreach.

I predict that if this is passed, sex traffickers and those who abuse women and young girls will be able to bring them to Connecticut and force them to have abortions due to our lax laws regarding parental consent. Why would we want to encourage that?

Please vote NO on HB 6618. Give women the care they need to bring their babies into the world rather than killing them.
